- chris forbes

MORTIFICATION/Envision Evangelene (Metal Mind Productions) This is another release by this band and it is some hard hitting death metal that rips into speed metal at times. The band are a Christian band, but that certainly does not turn me off. The music is the main thing for me and the music on this release is pretty damn good. Riffs that will move your neck and vocals that are sung with passion and hate, even though the message is positive. The production is good and the band get a pretty different and cool guitar sound that I liked. I never really paid this band much attention back in the day, but this is a solid release and you get 4 bonus live tracks on this puppy too. Info:
