

WINTER/Into Darkness/Eternal Frost (Metal Mind Productions) I remember when this 1st came out a few moons ago and at the time people were saying it was the heaviest band ever and others thought the band was too slow and hated the band. I can see why this band would have a love or hate following. I would not say I love the band, but they are easily one of the heaviest bands ever and to me doom metal has a sort of sad sound to it and these guys got that sound down pat. This is so slow and so heavy it might be painful to listen too he he. I know Symphony of Grief, who I managed for a time, totally were into this band. There is 8 tracks here and then you get 4 bonus tracks that were on an EP that the band released before they broke up. The band might be to slow for some, but to me doom metal is about playing slow and heavy and trust me it doesn't get much slower or heavier than this. Listen to the guitar sound and prepare to be blown away. This came out in 1992 originally and to this day I would say this band is easily one of the heaviest bands back then and it still stands true today. I had not heard the EP so having that on this was an added bonus and if you're a doom fan, then this has to be at the top of the list. Just don't cry listening to this OK. Info:
