SINISTER/Cross The Styx (Metal Mind Productions) Ah the bands 1st release and I had heard many things about this and this is right on par with the 3rd release. This again is more bone crushing no frills death metal that just hits hard often and hits hard. The band just blast and smash their way through these tunes and no jump metal, violins or clean vocals to be found. This is just plain straight forward speedy death metal with the vocals being the way death metal should be. The band just invite you on their rollercoaster ride and prepare for the brutality. Includes 2 bonus tracks as well. Info:
