

TANK/War Nation (Metal Mind Productions) This band has been around a long time and recently came back and this is their 2nd release since coming back and it is another excellent slab of metal. Tremendous hooks and song structures won me over easily by track 2. The singer has an excellent voice as he belts out the lyrics with passion and feeling. His voice fits in perfectly with this band as well. Just solid balls to the wall heavy metal at its core. Info:
