

IMMOLATION - *Dawn of Possession* · Metal Mind / MVD

What much can be said of a reissue with no bonus content? Surely we already all have this one in our personal archives don't we? Well, maybe this will serve as a history lesson for the new blood. While this was never my favorite IMMOLATION LP (I always thought *Here in After* blew this away), listening to it 15 years later makes me appreciate it all the more. These guys were brutalizing their strings and experimenting with odd timing when all these new Mathcore bands were sucking on Mommy's tit. Hail Satan. - 9
