

SOLITUDE AETURNUS/Into The Depths Of Sorrow (Metal Mind-originally released on Roadracer)

Finally this doom metal cult classic gets a re-release. This band is still around and this is their debut release and what a debut it is. Prime doom metal the way it was meant to be played along with some godly vocals.

Just listen to the massive sound this band gets on this and prepare to be blown away. There is also 3 demo bonus tracks and still to this day is one the heaviest albums ever made. Don't believe me? I dare you to find something heavier.
