

XENTRIX/Shattered Existence (Metal Mind Productions-originally released on Roadracer)

This is one of those re-releases, which was originally put out by Roadracer Records. This is godly thrash all the way. This also includes the band's rare 3 track EP as well. This is pure 100% old school bay area style thrash with tons of hooks and thrash metal aggressive singing. Each track is killer with no filler and if you missed this the 1st time around, don't be a fool and miss it a 2nd time. Pure heaven for the thrash metal fan such as myself. The 'Ghostbusters' cover tune is priceless. Info:
