

XENTRIX/Kin (Metal Mind Productions-originally released by Roadracer)

I liked this band's 1st release, but can't get into this to my ears this was just boring 3rd rate thrash metal. No speed, no aggression, no nothing. This is what killed thrash as all the bands wanted to be the next Metallica and lost all the speed and aggressiveness that they once had. I understand not ever song is gonna be fast, but when song after song is mid paced and slow, it gets boring at least to my ears. Some bands call it progressing, I call it selling out. Sadly, this just didn't a thing for me as I feel it is 3rd rate bad thrash. Info:
