

Znowwhite: *Act of God*

One of the first examples of female-led thrash bands, Znowwhite are sorely missed. This lot produced an album that is fondly remembered to this day. It is a considered a masterpiece by many and a classic by many more. This is one of those albums many have never heard of but you will kick yourself for not knowing about. This lot was at the forefront of 80's thrash and it blew quite a few stereotypes out of the metallic water. As with the rest of the remastering series from Roadrunner this sound is even fuller than when you first heard it, especially if it was on record. Liner notes are a nice addition as well. It's another one that every metal-head should own.
