

PESTILENCE/The Very Best of(Metal Mind Productions-originally released on Roadracer Records)

You have heard the name and you are not sure which CD from them to check out. Well, here is a best of from the band and even if you have all 4 of their releases, you will want some of the live tunes that is on this baby. This band played some of the most crushing death metal I have ever heard on their early stuff and then branched out in a more progressive, but still brutal vein. This still sounds fresh as it did many moons ago. The vocals are pure emotional death metal and the sound this band got is unmatched. Again sounding like a broken record, this band and the bands of yesterday played with feeling and emotion that lacks in today's bands. You also get a video clip so if your not familiar with this band it is time to get familiar and you can start with this baby. Info:
