This was a very good metal band that hailed from Tucson, AZ. Metal Mind has remastered two of their CDs and re-released them. I wasn't aware of this band back in the day but thanks to Clint Weiler I received this gem of a record. Better late than never, eh? Roadrunner Records noticed this band and they were signed. It was the heavy guitar riffs and lyrics that made this band poised for stardom. Unfortunately the band didn't last and I think they only made the two releases. It's a shame because they definitely made thrash their own. If people who don't normally care for thrash will find things to like about this band. There's a lot of variety on this CD and solid musicianship that keeps your attention. Truly a great thrash band.
