

SADUS/Swallow In Black (Metal Mind Productions-originally released by Roadracer)

This is the 2nd release from this band and like the other 2 it is chock full of speed, intensity, wicked rhythms, and off time changes that made this band into one of the best bands the underground has to offer. The also has 2 bonus tracks from the bands, "Death To Posers" demo as well. The music is intense, fast, rip roaring and unlike any other band. The singing is screaming and is unlike any other singer. The band got into a bit of a progressive style in spots on this release, but I didn't mind cause it was cool they just didn't do a re hash of their 1st release. If you missed this the 1st time around, trust me pick this up and check out one of the most underrated bands in the underground. Yeah they are that damn good. Info:
