Well what can I say? Aside from the tracking error, Swallowed In Black was over the top. Just totally insane metal. The music is definitely very intense and it brutalizes from start to finish. It's not quite as good as Chemical Exposure, but then we all have our favorites. However it's still killer material and there are so many songs on here that are notable. "Black" is a damn good one. While these guys definitely did not let down on speed they do have a variety of tempos on this release. And I have to say that the bass work on this CD really caught my attention. Steve DiGiorgio is just flat a master at his instrument. All in all great release.
