

TOXIC/Think This (Metal Mind Productions-originally released on Roadracer)

This band only put out 2 albums, but what 2 albums they are. This is the band's 2nd and it a little less thrashy than their debut and a bit more of the technical side, but who gives a rat's ass when the music is that damn good. This band came out in the late 80's and played tasteful progressive thrash metal with lots of hooks and clean piercing vocals. The production was perfect, a somewhat raw, but nevertheless heavy style. The music doesn't go over your head and the thrashy double bass parts had my heart melting. This band in my opinion blows away bands like Omen, Fates Warning, etc and they were one of the best progressive thrashy style bands back then and still are to this day. Info:
