

BULLDOZER/IX (Metal Mind Productions) This is the band's 3rd release being re-released by this awesome label. This is a bit faster than the 2 prior releases and it stills has that old Venom vibe that I love. While Venom had lost some of that power and stuff this band kept forging on getting better with each release. Listen to these crushing riffs and I dare you not to bang that head. The production is still raw, but not super raw, but just the right amount of rawness to make this what it is. This is dirty, nasty thrash metal with a wicked edge to it. The vocals are a pure thrash metal delight and it is awesome that this is on disc and a new generation of people can hear this and bow to Bulldozer. This is fast, intense and prepare for your neck to snap. Info:
