

BULLDOZER/Neuroderliri (Metal Mind Productions) This is 4th and last release from this band. The band still play raw speed/thrash metal, but on this they got away from Venom and had a more hardcore sound and even threw in some keyboards to boot. The band almost had a Motorhead vibe in spots and even though I don't like the keyboard parts, some of the fast stuff will leave you in the dust. The vocals are sung in a more hardcore way and this might be the most different of the 4 releases. It is not my favorite, but the band still maintained their sound and experimented a bit here and there. Info:
