

OPTIMUM WOUND PROFILE/Silver Or Lead (Metal Mind Productions) This is some hard hitting industrial style metal that was really good. I remember a bit about this band when this first came out a few years back, but didn't realize how good the band were until I heard this. This is jut crushing industrial music that is very original, very extreme and was very impressive. The production is right there and if you like industrial metal stuff then this is the release you need.
