

TROJAN/Chasing The Storm (Metal Mind Productions) I had never heard of this band and when I saw the word speed metal my eyes lit up. I wouldn't call this speed metal, but awesome well crafted power metal with tons of hooks and soaring vocals. From reading the bio this band made this one album and this disappeared and considering them came from across the ocean, that is probably why I missed them. The songs have tons of hooks and catchy riffs that will have that neck moving in no time. The vocals are the soaring 80's style that a lot of the power and heavy metal bands were using at that the time. 10 tracks that will bring you back in time and this was one release I am glad came out on CD. A classic. Info:
