THRASHER/Burning At The Speed Of Light (Metal Mind Productions) I remember

this coming out back in the 80's on Music For Nations, but until now have never heard it. This is a collection of musicians that got together and recorded this. This was like Carl Canedy (The Rods) little baby as he got musicians from metal, rock and thrash metal together. The opening track is a kick ass rock/metal number "Hot and Heavy" that just rips with a killer riff. The first 4 tunes are more rooted in rock/metal, but each sounds cool and has some wicked riffs. The next 5 are more heavy and are more in an early Y & T mode and sounded

good to these ears. There is a host of different singers and players on this, but it all works out in the end as these tunes just plain kick ass and this should have done way better when it came back out in the mid 80's as some of the

songs and riffs on this puppy are amazing and left me stunned at times. Info: [www.mvd2b2.com](http://www.mvd2b2.com)
