

VADER/De Profundis (Metal Mind Productions)

This is another re-release that if you didn't catch the 1st time around, you better this time. This is one of Vader's best releases as they smash through 9 blasting tracks of pure death metal and also an added Depeche Mode cover song as a bonus track. Vader are fast and furious and this release is no different. If you enjoy your death metal fast and faster, buy this.
