

## HATE/Victims (Metal Mind Productions)

This band has been around a bit and here is a new release from them. This band plays death metal in the vein of Cannibal Corpse and you know what this was a solid release of death metal. The band have moved away from C.C. a bit and forged their own sound. The band mix in a bit of newer style death metal and also the old style too. The riffs will have the neck banging and the drummer slams and beats his drums into submission. Killer version of "Reign in Blood" from these guys too.
