One of the cool things about this release is that the CD booklet is both in Polish and English. To me that's pretty fucking cool because I like to explore other languages and try to decipher them. The songs are mix of thrash, death, and hardcore. The vocals are a mixture of clean and howling from the bowels of Hell. The CD kicks you in the ass from start to finish and it's quite evident that one of the band's main influences is Slayer. The music is melodic and heavy and crushing. It's definitely a CD that people should check out.
