- 06. Electronic Zombies**
- 07. Industrial Disease**
- 08. Synthetic Future**
- 09. Lost In Ecstasy**
- 10. Cold**

This is a Polish death metal band that is true to the Gothenburg style of death metal. Lightning fast riffs and deep guttural growls are the mainstay of this release. There's a lot of really intricate guitar work that grabs your attention on this release as well as blast drum beats. There are four guitarists on this record that build layers upon layers of sound and there's a pretty good production and sound quality to the record. The vocalist is a female and she definitely belts out growls with the best of them. All in all this is not exactly a groundbreaking release but rather a release that was put out by very talented musicians who apparently have a deep love for Gothenburg style death metal. I find myself returning to this CD in the future.
