This Polish band has been around for 25 years and it's easy to see why. Their melodic songs are very catchy and you find yourself rocking out to each tune. They definitely are influenced by bands like Judas Priest and Iron Maiden while having a quality sound all of their own. From the minute you put the CD in, you're in store for a good headbanging time. This release is more in the vein of traditional heavy metal with great guitar playing and harmonic vocals. "Legend Of Thor" is instantly a huge favorite of mine with great guitar riffs and drumming. "Maqmra" has got some fucking intense and intricate guitar work. All in all these guys hold back nothing and you definitely want to crank this baby up to ten.
