I'm new to **SBB** even though they have been active for quite a while and have an important fan base.

On *New Century* they give us some very good hard rock with Prog tendencies. Perhaps **Uriah Heep** and even **Deep Purple** would be good references, even though **SBB** sometimes get more symphonic than these bands. There are also some blues elements in the music that gives it a special flavour.

The tracks on *New Century* are all very interesting and well performed. The production and sound of this Music DVD is of Top Level. If you have the necessary equipment to fully exploit the possibilities of this format, it will enhanced your listening pleasure in a significant manner.

New Century by **SBB** is a recommended purchase indeed. Good stuff!!
