Corruption play a style of stoner rock that sometimes resembles the aggressive sludge rock that once fused metal and hardcore like a Fudge Tunnel and Nailbomb. Corruption lay down monstrous and weighty grooves combined with rhythms that will keep your head bobbing and your fist pumping into the air. *Virgin's Milk* is the fifth outing for the Polish band. Corruption has perfected their sound; they have evolved into a solid unit that can give bands like Cathedral, Entombed and Spiritual Beggars a run for their money. Pick up the latest issue of High Times and fire up a bowl, kick back and let Corruption do their thing. The standout tracks on *Virgin's Milk* are: "99% Evil," "Fake Demon" and "Lucy Fair." Corruption isn't the most original band out there, but they are very capable and I have seen much growth in the last couple of albums.
