

CHAINSAW/The Journey Into The Heart Of Darkness (Metal Mind Productions) This was a power metal band and a nice one at that. They don't use all that chanting vocal stuff and instead rely on choppy power metal riffs to get their point across. The singer has a nice solid, clean voice and fits the music well. The band mix things up and hit the speed button at times and at others they go into a more mid paced mode and can even slow it down to almost a crawl too. The production is good and I like the guitar sound and songs on this. Info: www.metalmind.com.pl
