CHAINSAW/The Journey Into The Heart Of Darkness (Metal Mind Productions) This is some awesome power metal that I really liked a lot. The singer has an incredible set of pipes and he fits in with the melodic power metal style that this band is playing. Tons of riffs that will make any fan of power metal proud. This is not some clone power metal band neither that sounds like Hammerfall and the like. This is very excellent stuff and the band can turn up the power and speed when they need it and this just kicked my ass plain and simple. Info: www.mvdb2b.com
