- CHRIS FORBES

ASTHAROTH/Gloomy Experiments (Metal Mind Productions) I remember this band after reading the bio inside the CD. This is some bone crushing bay area style thrash that I really liked a lot. Bone crushing riffs and some great thrash metal vocals make this a winner. The band can really down the riffs has this had my head moving in no time. The production is on the money and this isn't just some Exodus clone band I think this band has their own style as they have just a hint of progressive metal within some of the tunes. There is 8 bonus tracks that were recorded after the debut came out in 89 and there are all bone crushing thrash tunes that are a bit different than the debut album stuff, but are still killer thrash nevertheless. This is an awesome re-release that belongs in the collection of any thrash fan hands down. Info:
