

MORTIFICATION/Conquer The World (Metal Mind Productions) This is a cool release for any of the bands fans that have not had a chance to see the band live here in the US and other places since to my knowledge the band hasn't toured much in the US, except for 1 tour that I can think of. You get a concert from the band from 2001 and also 4 bonus tracks. The band sound tight and as always with Metal Mind, the video quality is top notch. You also get some footage from various places that this band played as well. I have pretty much liked most of the stuff this band put out via the recent re-releases that I have heard and this DVD is another you need to add to your collection. Info:
