DECAPITATED/Human Dust (DVD) This is one killer DVD. This has footage from their 1st show in 2002 and they also played an Ozzfest in 2002 in Poland and there is footage of that as well here. The sound quality is A plus and the band sound as tight as a tight pair of spandex from the 80's. The band, if you don't know, played death metal in the vein of Vader and Immolation and they play with a fury of a charging bull. You also get some footage from a fest that played in 2004 and also 3 different interviews and a video clip. This is one killer DVD. Info:
