Human's Dust DVD

Track Listing:

Rating: 6 stars

Ok, so I knew a little about Decapitated before I saw this dvd, BUT, this was actually my first time really getting to see the band play live, because they never really played alot of shows in the USA, & sadly, after the bands drummer passed away, the band has been on hiatus. It's interesting to watch the dvd, to see how the band evolved, how they went from a good death metal band to a GREAT death metal band, & the bands lead screamer looks like a totally different person in the concert clips..you see him going from a long haired dude to a clean shaven baldy! On a technical level, Decapitated are the most technical death metal band I've ever heard..they were amazing, & the only sad part of this dvd is, there's interviews with the band, BUT, they are in another language, so if you only speak English, you might wanna avoid the interview clips!
