GORGOROTH/Black Mass Krakow 2004 DVD (MVD) Holy shit is the easily one of the best DVD'S I have ever seen. The camera work on this is godly and the band are as tight as Nina Hartley's ass! The band have an incredible stage set up with a killer light show, goat heads, pyro and even naked people. The place where they filled me this at is filled with metalheads and it is a huge place and it packed to rafters so to speak. The band rip through an intense set of black metal and like a said the camera work is top notch and the lights and everything just looks incredible. You also get some clips from another concert. This gets an A plus from me. Easily one of the best black metal bands making the rounds now. Info:
