

### MVD makes music on DVD

Later this summer, MVD Visual will provide a blend of old and new. In the new category, the U.K. band Marillion is captured over the final two nights of their *Somewhere Else* album tour in June 2007. Going back to the old, MVD will offer DVDs featuring an assortment of classic bands. In *Yes: The Director's Cut*, the progressive rock band that came into prominence in the '70s can be seen in performances from their 2003 tour. The artist now known as Yusuf Islam is featured in the DVD *Tea for the Tillerman*, a performance from 1971, when he was still known as Cat Stevens, that also includes his animated short "Teaser and the Firecat." Then British blues artist John Mayall goes to the heart of America in his *Live at Iowa State University* performance from the '80s. And finally, The Beatles' 1967 *Magical Mystery Tour* movie can be remembered in a documentary in which people close to the production reflect on the fun they had with The Beatles in making the film. **VB**—C.S.
