

ADROMEDA
Playing Off The Board DVD
(MVD Visual)
by Chris Forbes

This really didn't do anything for me. I really tried to like it, but by song #6 I was bored to tears. This band plays progressive metal with lots of keyboards and the songs to be felt flat and didn't mix to me. I didn't like the singer and the songs just plodded along and just didn't reel me in like the above DVD did. If your into this band, the production and camera work are A plus and you get bonus videos, old footage etc, but this is not for me. Info: <http://www.mvdb2b.com>
