By the time you hear it ... you're already dead!

A group of college friends on a spring break camping trip are stalked and slashed by an unknown creature with the ability to make them hallucinate through sound waves. The survivors hold up refuge in an isolated farmhouse, cut off from all communication. Now, they have to come up with a plan to kill this unrelenting creature before it kills them. "Banshee!!!" takes the idea of the legendary Irish myth and spins it around into a terrifying and unstoppable monster!

Initially, I wasn't sure what to make of this movie. I was honestly expecting a low budget, no talent, horrible dialogue movie that I'd only make it half way through. I was wrong. The movie starts off with a bang and kept me at the edge of my seat for the duration. It's plot has yet to be touched on with this genre and kept me guessing for the long run. My only complaint is that the origin of why a Banshee was in the back woods of Connecticut was never explained and perhaps better left unexplained.

The special effects and creature effects are amazing. The static displayed while the Banshee was shifting are top notch. The gore and blood was kept to a safe level. Not so much to turn one off and just enough to keep it real. Some of the acting may have been a little flat, but those characters were killed off early on.
