MVD Visual releases three "Solos Jazz Sessions" titles, featuring unaccompanied performances by some of the brightest stars, and up-and-comers, in the jazz world: **GONZALO RUBALCABA** shows why he has become one of the most important Afro-Cuban jazz artists since his debut in the 1990s. **ANDREW HILL** was a groundbreaking composer and pianist, renowned for his spontaneity and lack of cliché, working to extend the techniques of bop and hard bop while many of his contemporaries abandoned them altogether. **LEE KONITZ** is one of the most revered alto sax players, specializing in cool tones and driven by an insatiable musical curiosity which has made him one of the most innovative musicians on the scene. All programs were originally broadcast on Bravo!Canada. All are widescreen. Dolby 2.0 stereo.
