...for family-friendly news and reviews.

At the age of 23, River Phoenix was a popular film star as well as his family's source of income. Self-medicating, he attempted to relieve the demands of both these roles.

In *River Phoenix - His Final Hours*, there are a number of details regarding the death of River Phoenix that are at odds with other sources. The events of his life as a child are glossed over, and the amount of drinking and other drugs he had consumed the night he died are not mentioned. This "psychological detective story" does not "uncover the mystery of why [Phoenix] died," but chronicles a life and death that had already been thoroughly exposed. There are no extra features on *River Phoenix - His Final Hours*.
