In this note

No one.

JAMDOWN takes you on a journey back to Kingston, Jamaica 1980, straight into the heart of the Jamaican reggae scene, following legendary Reggae artists Toots Hibbert and The Congo's.

The film, shot in 1980 had a limited release in France and therefore remained relatively undiscovered by the rest of the world. For the first time in almost 30yrs this film has now been made available to own on dvd.

The film contains some of the only known early footage of The Congos, performing tracks from their legendary Heart Of The Congo's LP which was produced by Lee Perry at the Black Ark studios at the height of their career.

Jamdown contains some of the most electrifying live reggae footage to have ever been captured on film.

"Jamdown" is a melodic time machine that transports us magically to a time of massive creativity as reggae was emerging to the outside world. We see some of its most rootical exponents at the height of their powers. The film's re-emergence after three decades is almost miraculous, and it should not be missed by anyone who cares about Jah Music." – Roger Steffens – Reggae Historian
