### **Cactus Live, Loud and Proud**

Cactus has been around for 40 years and if you haven't heard them, this is a great chance to hear one of the truly great bar bands in the history of rock do what they do best: Play no nonsense rock and roll. They're not much to look at – and the interviews included in the extras are too rambling to give you any real sense of their place in music history – but the music speaks volumes, especially when you play it loud. 3 stars

- John Black
