**Hewhocannotbenamed** - *Sunday School Massacre* (CD, Greedy / [MVD Audio](#), Rock)

Being big fans of **The Dwarves** since *way back when*, we weren't quite sure what to expect from **Hewhocannotbenamed**'s debut solo album. Would it be like an offshoot of a Dwarves album...or something totally different...? Actually more the former than the latter...but with plenty of the latter thrown in for good measure. For better or for worse, Hewhocannotbenamed is probably best known as the guitarist who plays totally nude and wears face masks so that he is unrecognizable. *Sunday School Massacre* is probably more catchy and accessible than most folks would have expected. Many of these songs were written while Hewho... was working at a residential treatment facility for teenagers suffering from mental illness and/or abuse (?!?!). Plenty of tight, cool, buzzsaw pop titties here including "Happy Suicide," "Superhero," "Hate Song," and "Motorboating." Some of these cuts are impossibly *catchy*.
