### **Eric Sardinas and Big Motor Live**

Eric Sardinas makes it clear in the interview portions of this DVD that he plays the music he believes in the way he wants to play it and the heck with anybody who doesn't want to listen to it. That's all well and good, and if you are a big fan of Big Motor's generic mix of blues/rock, then you may enjoy watching them play it live. For those unfamiliar with their sounds, or who want a little variety in the music they hear, it may be better to search them out on line before settling down to watch them for a solid hour. Musically they deliver (even if it's the same sound in every song) but visually, they're not much to look at. 2 stars
