Even though they'll never admit it, women are the most powerful farters on this planet. This is primarily due to the fact that women spend most of their lives holding them in when they're in public. Once they're in the privacy of their own homes, women release the butt hounds and when they do, it's not a pretty site. Don't get me wrong, I don't have a problem with female farts and I hope we can one day live in a world where women and men can fart together in perfect harmony.
