## Creep Creepersin's Frankenstein DVD Review

April 7, 2011 No Comments

Victor (James Porter) is a socially inept man who lives alone in the family house watching horror movies all the time. His only companion is a rat named Frankenstein who he has domesticated. After the death of his mother, Victor's mental capacities appear to have degenerated to the degree that he is unable to interact with other humans. When Frankenstein suggests that Victor create a companion like Dr. Frankenstein did in the classic story he is first reluctant but soon embraces the idea and sets out to locate someone to assemble his own bride.

The plot is fairly minimal as Victor lures a female over tries to turn her into a Bride of Frankenstein type monster. He draws stitches on with a sharpie and soon the girl revives. I really can't go much more in depth because the second half of the movie spirals to the point that I was not sure what was reality and what was actually a product of Victor's hyperactive imagination.

The story itself is rather nondescript and feels shuffled at times but director/writer Creep Creepersin has a few nice effects that I found unique. The first is when Victor attempts to have a conversation with any female. The

woman's voice becomes distorted and undistinguishable, driving home the unease he feels in talking to women and his inability to interact socially. The other was the music. It was heavy and oppressive and felt like it fit perfectly with this nightmare vision of a film where everything feels hazy and his home feels so disconnected from everyone else.

This is a strange movie to discuss as it didn't feel like a scripted movie but more like a conceptual montage to classic horror movies. The opening features a lot of footage from the movies Victor is watching with Frankenstein while eating his scrambled eggs and the rest of the movie is sprinkled with shots of films such as *The Cabinet of Dr. Caligari*. It appears that the television set is the one that speaks to Victor and plants the seed of abducting a girl but Victor actually seems to think it is his pet rat who suggests it.

The only actor that can be discussed is James Porter who portrays Victor. He overplays the mental issues a bit and his talking is almost to the level of Johnny Knoxville in . There are a few women in the movie as well but since their dialog is distorted and their roles are basically victims, it is not really possible to discuss their performances.

Special features include a short documentary on the project that predominantly features Creepersin himself discussing the movie as well as the original Frankenstein which inspired it. Also included is the trailer for Frankenstein which is actually just the final scene of the movie.

Creep Creepersin's Frankenstein is a creepy little indie horror film that is more style than substance. I liked a few of the effects but the overall story really doesn't go anywhere. If you like movies that feel dreamlike and somewhat disjointed you will definitely appreciate what Creepersin brings to the table. If you are looking for more of a straightforward narrative horror story then you should pass on it.

### Special Features:

- Making of Creep Creepersin's Frankenstein
- Original Trailer

Creep Creepersin's Frankenstein is available as of March 22, 2011, courtesy of MVD Visual.
