

CHANCE WIESNER

"Takin' a Chance On Love"

This 11 song record starts off with a piano driven track called "Malibu" that has NOTHING to do with the Hole song of the same name & it kinda reminds me of "Fade Into You" just a tad while "Wandering One" reminds me of an obscure Doors song...overall the music is retro sounding & lo fi which is the overall charm to this record..it's NOT mainstream & will never make the band rich and that's NOT what true art is about in all honesty...this record is an expression of creativity.

DUG PINNICK

"naked"

AMAZING! That's how I'd describe Dug Pinnick's new solo record because the first song starts off heavy as hell with a killer groove & the lyrics ARE the Dug Pinnick story which...it's the sad reality that he has no insurance, never made much money yet he's traveled the world & lived his life like a rock star without any riches.

"If You Fuk Up" is my personal favorite off the record because the chorus is pure pop with a hard rock edge & I can't help but fall in love with this song...it's probably my personal favorite for 2013 in all honesty because it's just that damn good!

"Heart Attack" has a cool time signature and overall I think this entire record is kick ass from start to finish because Dug knows himself quite well & the music on this record doesn't veer too far from what Dug does well...it's hard rock with soul, a touch of blues, a few slow moments & for the most part the overall vibe is just REALLY heavy!

MERDASTER

"La Furia"

Originating from Chile this band has been around for 15 years & this is their 3rd record...my only complaint is that all of their stuff is in another language & I can't understand anything they say right down to the song titles!

Musically the band crushes & they are definitely power metal personified...the production is
