KOMMANDANT / Stormlegion (MVD Music)

This is a re-release of this as it originally came out in 2008. This is raw black metal that is played the right way. Not a bunch of generic fast as fuck riffs that go nowhere. No vocals that sound like some kid in the woods. No this is music that hits fast, hits hard and hits with authority and sounds great. Pure hateful vocals that have feeling and intensity and they match the music and the one, two, punch of the music and the vocals make this one of the best black metal releases I have heard and is well worth getting and is way better than all that generic black metal junk out there.
