

TERROR/The Bowery Collection (MVD Audio) 11 tracks of raw NYHC the way it should be played, vicious, nasty, and filled with hate. The band just rip through these tunes with a fury not matched by many. You can just feel the power burn out of my speakers as this played on. No groove, no Pantera, no trends, just pure NYHC the way it was played in the 80s only done in 2004 this time baby. I managed to get to CBGBs a few times and the sound system and just the place itself was unlike any other venue expect maybe Lamour's. This is a live recording taken from there and if you call yourself a fan of hardcore, pick this up at all costs. Info:
