H2O - CBGB

The latest installment in the Bowery Collection, is a fine set played by NYHC stalwarts H2O. They played a great set on that August night including but not limited to "F.T.T.W.", "Thicker Than Water" and "Spirit Of '84".

The sound is pretty good, the energy levels are soaring skyhigh and by buying this disc, you're supporting the Hilly Krystal Foundation for Musicians and Artists... there's simply no going wrong here with another fine recording straight from the soundboards of CBGB.

Score: 8 out of 10
