These dudes are bananas. Imagine if the The Byrds had continued with the sound they created on *The Fifth Dimension* cut out the vocals and you would have Yahowa 13. While their sound is a bit dated Yahowa 13 make some seriously trippy music. My favorite aspect is all the backwards-looped guitar tracks featured in every song. Also included in the booklet is a map through their auditory psychedelic journey explaining the numerology and sounds featured in the album. Think of it as a way for the band to be there for you in case your LSD trip starts to go bad. I wish bands with a newer sound put the same kind of spirituality and passion into their music like Yahowa 13 does, because if they did their music would be a lot more meaningful. —*Jon Robertson*
