AMERICAN SPEEDWAY
"SHIP OF FOOLS" LP/CD
Prophase Music

www.myspace.com/americanspeedway

This is a band that escaped my radar up until I discovered their bio on Interpunk.com, who stated that American Speedway was a high-energy, kick-ass rock and roll band, mentioning the likes of Zeke, Speeddealer and AC/DC. So I obviously went for it, taking the chance, as I love that style of music. They were right but they forgot how much the singer and the music sound like Nashville Pussy. This is a great album from start to finish, packaged just the way I like it with a CD that comes along with the vinyl. They are from the Philadelphia area, so I am looking forward to checking them out live. This is limited to 500 copies. Do not let this punk and rock energy speed under your radar!
